MASOMO TECH

ONLINE AND LONG DISTANCE LEARNING SYSTEMS

In these uncertain times when the Corona Virus pandemic has caused the government to force closure of all learning institutions, learning has been paralyzed with no clear end of this season in sight.

At Masomo Tech, we are aiding private schools to continue with their learning activities from home with the use of a smart phone or a computer. It has an android and iPhone app for ease of use by the parents and kids.

We will set up the online learning system within 7 days and offer training to the teachers and an administrator to get the system fully running.

We provide a detailed user manual as well as train a resident administrator, usually a computer teacher, to ensure a smooth running of the system. Our distance learning system is affordable and can be used for the various levels of educational institutions.

The system can be used alongside other teaching methods in the school. It will also become very useful during the long holidays as the teachers can continue with the syllabus especially in the very long December holidays.

Why adopt our
learning system?

01 | Affordable

02 | Easy to use

03 | Scalable

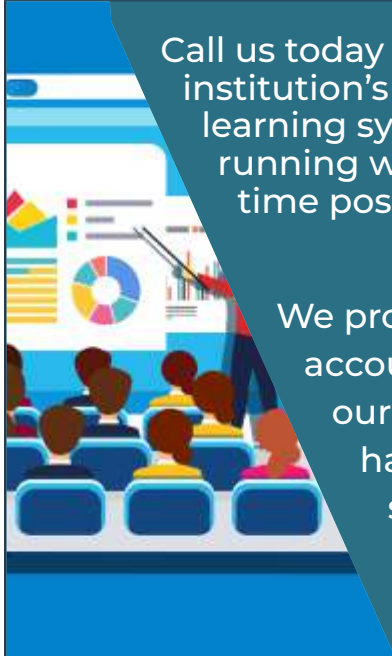

04 | Lightweight

SYSTEM FEATURES

Our system is feature rich and sets itself apart from other available systems in the country. The features are countless and many more can be added with time as the school fully adopts this system. Some of the features include:

- Fully online based,
- Low data usage as video option is optional,
- Accessibility via a browser and app,
- Timed assignments and tests to encourage pupils' activity,
- No downloading or printing,
- Teachers mark on their phones or computers,
- Instant notification of new assignments,
- Instant notification of graded assignments,
- Teachers type their assignment and issue to students instantly on their phones or computer,
- App available for Android and iPhone,
- Very easy to use even for parents and students, who sometimes struggle with technology,
- Similar system to the one used in universities like Mount Kenya and Kenyatta University for distance learning courses.
- No annual subscription like fees, the school owns the system in perpetuity,
- Fully scalable and can be implemented for various levels of education, primary, secondary and tertiary institutions.

Call us today to get your institution's distance learning system up and running within the shortest time possible.

We provide a demo trial account upon request for our prospective clients to have a general feel of the system before we roll it for the institution.

Sample of using the app to submit assignments

The system can be used on an app or a browser such as Chrome or Mozilla firefox.

For use on a browser, just go to demo.masomotech.co.ke and log in then follow the steps as outline below.

For usage with the app:
- go to Google Playstore or Apple App store, search and download Moodle app

For the site address part, input

demo.masomotech.co.ke

and click CONNECT

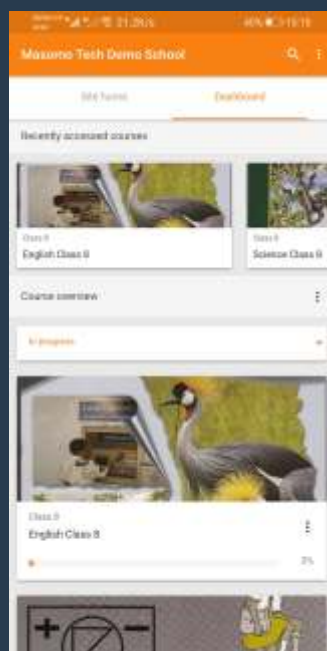

Log in with the following:
username: student
password: Student1+1

please note, username is all small letters and password has the first letter as capital S

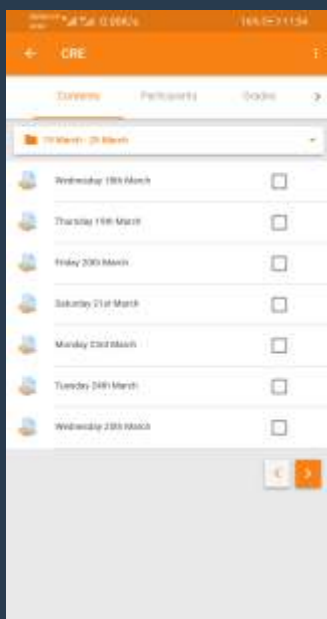

Downloading and installing app

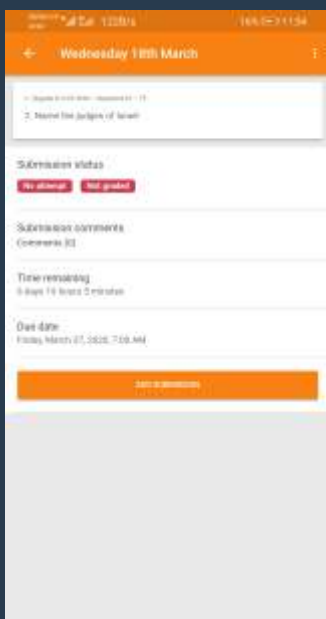

Logging into the app
